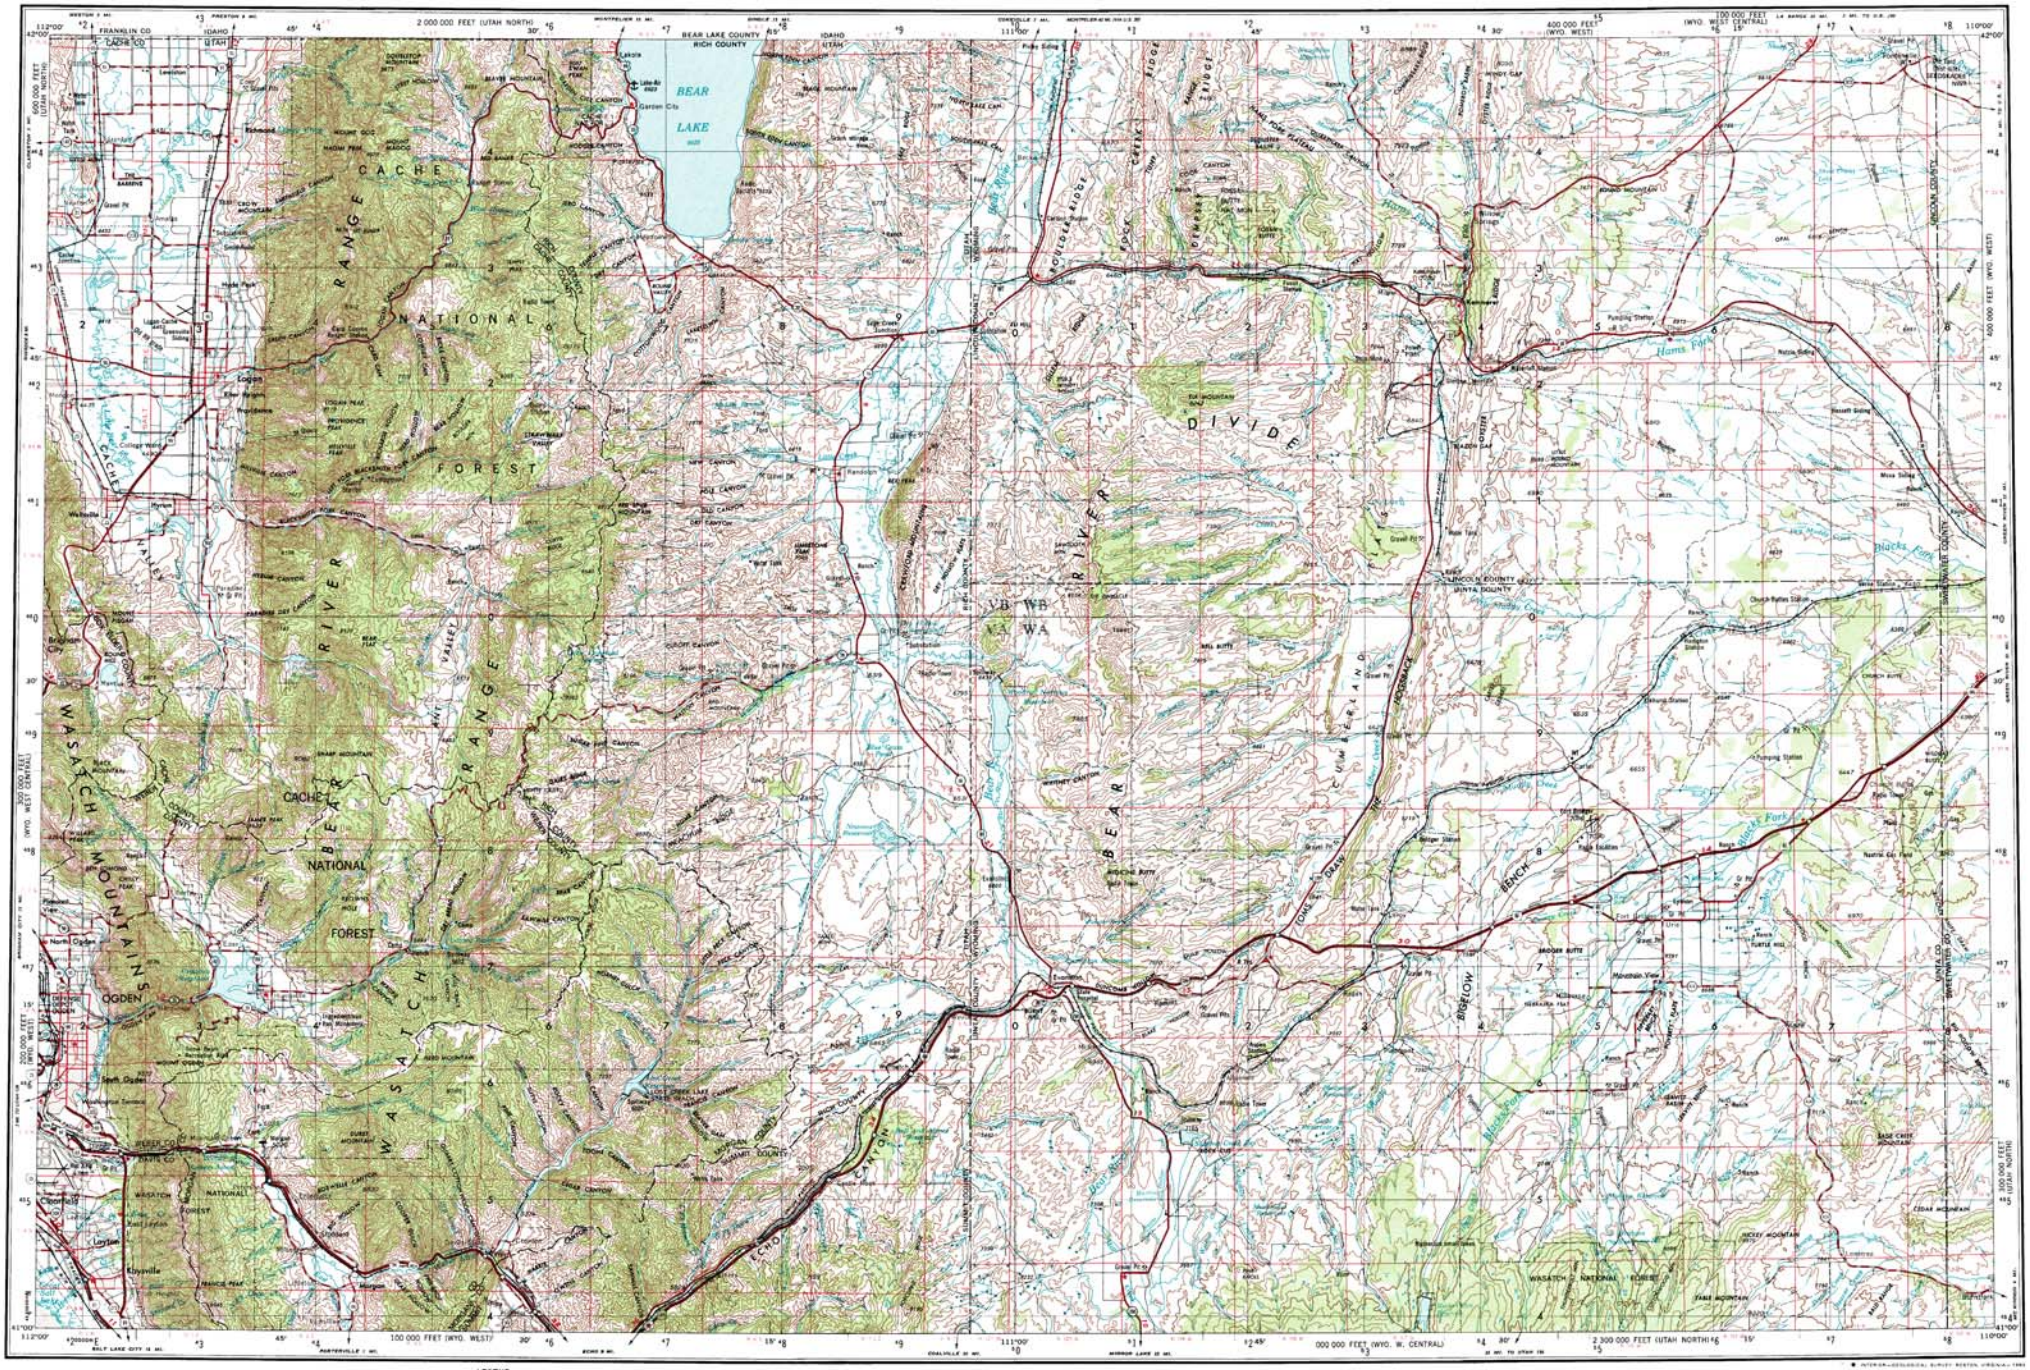
OGDEN



PRODUCED BY THE U. S. GEOLOGICAL SURVEY

Base map prepared by Defense Mapping Agency by photogrammetric methods and from 1:62,500- and 1:125,000-scale maps dated 1910-1939. Field checked 1954. Revised by the U. S. Geological Survey from aerial photographs taken 1971 and 1978 and other source data. Revised information not field checked. Map edited 1982

Transverse Mercator Projection. 10,000-meter Universal Transverse Mercator grid, zone 12: 100,000-foot grid ticks based on Wyoming coordinate system, west and west central zones, and Utah coordinate system, north zone. 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 10 meters north and 63 meters east

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram

There may be private inholdings within the boundaries of the National or State reservations shown on this map

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

SAMPLE POINT: 12SUV

1. Read letters identifying 100,000-meter square in which the point lies
2. Locate first WESTERLY grid line LEFT of point and read LARGE figure labeling the line either on the top or bottom margin, or on the line itself. Estimate tenths food and line to point
3. Locate line NORTHWARD, give line the SMALL figure labeling the line either labeling the line either on the bottom right margin, or on the line itself. Estimate tenths food and line to point

SAMPLE REFERENCE: 12SUV5275

If reading means UP or are direction, prefix Grid Zone Designation as: 12SUV5275
