</table>

$^1$Includes waste coal burned at Sunnyside Cogen

$^2$Blast furnace gas, propane gas, and other manufactured and waste gases derived from fossil fuels

Source: EIA, Electric Power Annual - Historical state-level tables

$^5$EIA's 2005 coal consumption numbers are incorrect; 634,384 tons of sub-bituminous coal burned at IPP was double counted. The correct number is recorded above.
