Note: For the 2003 period forward, the Transportation consumer sector replaces the Other sector which included public street lighting, public buildings, electrified rail and transit systems and some agricultural sector data such as irrigation load. The Transportation sector consists entirely of electrified rail and urban transit systems. Data previously reported under the Other consumer sector have been relocated to the Commercial sector for 2003. Agriculture related data (i.e., irrigation load) previously reported in the Other sector have been relocated to the Industrial sector where identified.

Note: "Other" refers to customers who do not clearly fit in the residential, commercial, or industrial sectors. "Other" customers are often government buildings or public facilities, irrigation districts (that are not also electric utilities), individual irrigation customers (mostly for cooperative respondents), electrified rail, or places of worship.
